

Annual Population Survey	
ONS Crown Copyright Reserved [from Nomis on 2 February 2017]	
confidence	95% confidence interval of percent figure (+/-)
date	Oct 2015-Sep 2016

Area	all persons employed in public sector as % of all persons in employment		all persons employed in private sector as % of all persons in employment	
	numerator	percent	numerator	percent
Ualad09: Havering	29,100	23.6	94,200	76.4
Country: Great Britain	6,682,500	22.0	23,688,100	78.0
Gor: London	849,900	19.1	3,589,400	80.9

20/07/2016 Data has been reweighted in line with the latest ONS estimates.
<p>The preferred source of statistics for public sector employment is the Quarterly Public Sector Employment Survey (QPSES) and external sources, however, figures from this source are not available below government office region level. Individuals in the Annual Population Survey (APS) are classified to the public or private sector according to their responses to the survey.</p> <p>Consequently, the classification of an individuals sector may differ from how they would be classified in QPSES statistics. Official estimates of public sector employment compiled from QPSES are generally lower than estimates available from APS. This is partially because many people who work within public sector premises, whilst being employed by private sector organizations, will classify themselves as working in the public sector, e.g. cleaners or security guards employed by a contractor to work at public sector premises. Results of QPSES are available at: http://www.ons.gov.uk/ons/rel/pse/public-sector-employment/index.html A brief guide to sources of public sector data is available from here: http://www.ons.gov.uk/ons/rel/pse/public-sector-employment/a-brief-guide-to-sources-of-public-sector-employment-statistics/index.html.</p>
